

INFANT JESUS CONVENT SCHOOL
ANNUAL PLAN, 2023-24
MATHEMATICS - CLASS: IX

MONTH/NO OF DAYS	TOPIC: SUB TOPIC	OBJECTIVES	AIDS/ACTIVITIES	MULTIPLE INTELLIGENCE SKILLS	LEARNING OUTCOME
<p>EXTRA CLASSES No of Days: 10</p> <p>April No of Days - 17</p>	<p>NUMBER SYSTEMS:</p> <ul style="list-style-type: none"> • Rational and irrational numbers • Representation on the number line • Decimal expansion 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Differentiate between rational and irrational numbers • Represent irrational numbers on the number line • Compute decimal expansion of rational and irrational numbers 	<p>KNOWLEDGE:</p> <ul style="list-style-type: none"> • Indicate different numbers in the number system • Convert decimals into rational numbers • Sketch the number line and mark different rational numbers <p>SKILLS:</p> <ul style="list-style-type: none"> • Analytical thinking • Problem solving • Construction <p>APPLICATION:</p> <ul style="list-style-type: none"> • Discussing the number system along with relevant examples • Solving the problems using various concepts • Demonstrating the construction 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Comprehend the difference between rational and irrational numbers • Solve and obtain the decimal expansion of real numbers • Identify and visualize irrational numbers on the number line

			<p>work</p> <p>UNDERSTANDING:</p> <ul style="list-style-type: none"> • Distinguish between rational and irrational numbers • Express decimal expansion of real numbers • Locate irrational numbers on the number line 		
	<p>NUMBER SYSTEMS:</p> <ul style="list-style-type: none"> • Rationalization • Laws of exponents <p>COORDINATE GEOMETRY:</p> <ul style="list-style-type: none"> • Basic terminology • Identification and plotting of coordinates <p>LINEAR EQUATIONS IN TWO VARIABLES:</p> <ul style="list-style-type: none"> • Standard form • Solutions of linear equations in two variables 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Analyze the given denominator and rationalize • Identify different laws of exponents and apply the same • Identify and plot different coordinates on the graph sheet • Find area of different figures formed by joining various coordinates along with their mirror 	<p>KNOWLEDGE:</p> <ul style="list-style-type: none"> • Recall rational and irrational numbers in the number system • Compute square root of the given irrational numbers • State different algebraic identities • Enlist different laws of exponents • Recall basic terminology associated with the graph sheet • Substitute different values to solve the given linear equation <p>SKILLS:</p> <ul style="list-style-type: none"> • Critical thinking • Deductive 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Spatial 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Interpret the problems and apply the method of rationalization/laws of exponents • Plot various coordinates on the graph sheet and interpret • Obtain mirror image of the given coordinates • Translate the linear equations in two variables in standard form and find solutions using hit and trial method

		<p>image</p> <ul style="list-style-type: none">• Translate the linear equations in two variables in standard form• Solve linear equations in two variables and find solutions	<p>reasoning</p> <ul style="list-style-type: none">• Construction• Visual representation <p>APPLICATION:</p> <ul style="list-style-type: none">• Illustrating the method of rationalization along with relevant examples• Interpreting and solving the problems based on different laws of exponents• Demonstrating the construction work and plotting of various coordinates on the graph sheet• Giving examples of standard form and solving linear equations in two variables <p>UNDERSTANDING:</p> <ul style="list-style-type: none">• Solve problems based on rationalization and various laws of exponents• Plot and label various coordinates on the		
--	--	--	--	--	--

			graph sheet <ul style="list-style-type: none"> • Write the linear equations in two variables in standard form and find solutions 		
MAY No of Days:12	LINEAR EQUATIONS IN TWO VARIABLES: <ul style="list-style-type: none"> • Graph of linear equations in two variables 	Students will be able to: <ul style="list-style-type: none"> • Translate the word problems and interpret mathematically • Draw the graph of linear equations in two variables 	KNOWLEDGE: <ul style="list-style-type: none"> • Recall the basic terminology associated with the graph • Plot coordinates on a graph sheet SKILLS: <ul style="list-style-type: none"> • Logical thinking • Deductive reasoning • Visual representation APPLICATION: <ul style="list-style-type: none"> • Interpreting the problems mathematically and framing linear equations in two variables • Demonstrating the graph work by plotting given coordinates on the graph sheet UNDERSTANDING: <ul style="list-style-type: none"> • Solve word 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Spatial 	Students will be able to: <ul style="list-style-type: none"> • Interpret the problems mathematically and frame the linear equations in two variables • Represent the linear equations in two variables graphically

			problems based on linear equations in two variables <ul style="list-style-type: none"> • Draw the graph of linear equations in two variables 		
REVISION: PT-1					
CONDUCTION OF PT-1 ASSESSMENT					
<p style="text-align: center;">JULY No of Days:23</p>	INTRODUCTION TO EUCLID'S GEOMETRY: <ul style="list-style-type: none"> • Euclid's biography and his contribution in Mathematics • Euclid's definitions, axioms and postulates STATISTICS: <ul style="list-style-type: none"> • Graphical representation of data 	Students will be able to: <ul style="list-style-type: none"> • Enlist Euclid's axioms and postulates and differentiate between them • Identify the application of Euclid's axioms and postulates in various geometrical concepts • Reiterate Euclid's fifth postulate • Represent the given data graphically 	KNOWLEDGE: <ul style="list-style-type: none"> • Recall the basic geometric terms • Define average • Make ungrouped frequency distribution table • Draw bar graphs, histograms of uniform and varying width and frequency polygons SKILLS: <ul style="list-style-type: none"> • Analytical thinking • Deductive reasoning • Formulating hypothesis • Visual representation APPLICATION: <ul style="list-style-type: none"> • Illustrating Euclid's axioms and postulates 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Linguistic • Spatial 	Students will be able to: <ul style="list-style-type: none"> • Know about Euclid's contribution in mathematics • Differentiate between Euclid's axioms and postulates • Apply Euclid's axioms and postulates in various geometrical concepts • Analyze the equivalent version of Euclid's fifth postulate • Draw the bar graph, histogram and frequency polygon based on the given data

			<p>along with relevant examples</p> <ul style="list-style-type: none"> • Interpreting Euclid's fifth postulate in a different way • Applying Euclid's axioms and postulates in different problems • Representing data using bar graphs and histograms of uniform and varying width <p>UNDERSTANDING:</p> <ul style="list-style-type: none"> • Identify Euclid's axioms and postulates and express with relevant examples • Represent the given data graphically 		
<p>AUGUST No of Days:23</p>	<p>LINES AND ANGLES:</p> <ul style="list-style-type: none"> • Basic geometrical terms related to lines and angles • Angle axioms related to parallel lines • Properties based on triangles <p>HERON'S FORMULA:</p> <ul style="list-style-type: none"> • Area of triangles with no height given 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Recall basic geometrical terms related to lines and angles • Identify different angles made by the 	<p>KNOWLEDGE:</p> <ul style="list-style-type: none"> • Recall the basic geometric terms related to lines and angles • State angle axioms and properties related to triangles • Recall formulae to find area of various two- 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Spatial 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Revise basic geometrical terms related to lines and angles • Correlate different angles made by the transversal with parallel lines

		<p>transversal with parallel lines</p> <ul style="list-style-type: none"> • State different properties related to triangles and apply the same in figure based questions • Find area of triangles using Heron's formula 	<p>dimensional figures</p> <p>SKILLS:</p> <ul style="list-style-type: none"> • Critical thinking • Deductive reasoning • Formulating hypothesis • Visual representation • Problem solving <p>APPLICATION:</p> <ul style="list-style-type: none"> • Demonstrating angle axioms and properties related to triangles along with relevant figure based questions • Discussing Heron's formula along with relevant illustrations <p>UNDERSTANDING:</p> <ul style="list-style-type: none"> • Identify different angle axioms • Explain the proof of various properties related to triangles • Solve figure based questions • Find area of 		<ul style="list-style-type: none"> • Prove the properties related to triangles • Solve figure based questions using different axioms and properties • State Heron's formula • Find area of triangles using Heron's formula
--	--	---	---	--	--

			triangles using Heron's formula		
SEPTEMBER No of Days:05	REVISION: PT 2/TERM-1				
CONDUCTION OF PT 2/TERM-1 ASSESSMENT					
OCTOBER No of Days:22	QUADRILATERALS: <ul style="list-style-type: none"> • Quadrilateral and its types • Properties of various quadrilaterals • Theorems along with application based questions 	Students will be able to: <ul style="list-style-type: none"> • Distinguish various kinds of quadrilaterals based on properties and figures • Understand different theorems along with relevant illustrations 	KNOWLEDGE: <ul style="list-style-type: none"> • Identify various quadrilaterals based on properties and figures SKILLS: <ul style="list-style-type: none"> • Logical thinking • Deductive reasoning • Visual representation • Problem solving APPLICATION: <ul style="list-style-type: none"> • Giving examples of figure based questions using different properties and theorems UNDERSTANDING: <ul style="list-style-type: none"> • Classify various quadrilaterals on the basis of their properties • Solve figure based questions using 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Spatial 	Students will be able to: <ul style="list-style-type: none"> • Recall the properties of various quadrilaterals • Solve figure based questions using different properties and theorems

			different properties and theorems		
NOVEMBER No of Days:22	<p>POLYNOMIALS:</p> <ul style="list-style-type: none"> • Basic terms and definitions • Theorems • Factorization of polynomials • Algebraic identities <p>TRIANGLES:</p> <ul style="list-style-type: none"> • Basic definitions • Congruence of triangles • Properties of a triangle 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Find zeroes of a polynomial • Understand the application of theorems in various polynomials • Factorize polynomials using middle term split method and algebraic identities • Differentiate among different criteria for congruence of triangles • State and prove the properties based on a triangle • Solve figure based questions 	<p>KNOWLEDGE:</p> <ul style="list-style-type: none"> • Recall the basic terminology associated with polynomials • Identify various algebraic identities • State different congruence rules and properties based on triangles <p>SKILLS:</p> <ul style="list-style-type: none"> • Logical thinking • Deductive reasoning • Visual representation • Problem solving <p>APPLICATION:</p> <ul style="list-style-type: none"> • Discussing the terms and degree of polynomials • Explaining the application of theorems • Giving examples of various polynomials for factorization using middle term split method and 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Spatial 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Rehearse the basic terminology • Classify polynomials on the basis of terms and degrees • Analyze the theorems and understand the application • Identify different algebraic identities to factorize the polynomials • Enlist different congruence criterion for triangles • Apply different congruence rules and properties to solve figure based questions

			<p>algebraic identities</p> <ul style="list-style-type: none"> • Demonstrating congruence rules and properties related to triangles along with relevant figure based questions <p>UNDERSTANDING:</p> <ul style="list-style-type: none"> • Classify various quadrilaterals on the basis of their terms and degrees • Solve questions to find zeroes of a polynomial • Recognize various algebraic identities and theorems to factorize the polynomials • Identify different properties and congruence criteria to solve figure based questions 		
REVISION: PT-3					
CONDUCTION OF PT-3 ASSESSMENT					
<p>DECEMBER</p> <p>No of Days:12</p>	<p>SURFACE AREAS AND VOLUMES:</p> <ul style="list-style-type: none"> • Surface areas and 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Identify 	<p>KNOWLEDGE:</p> <ul style="list-style-type: none"> • Recall the basic terminology 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Rehearse the basic

	<p>volumes of different solid figures</p>	<p>similarities and differences among different solid figures</p> <ul style="list-style-type: none"> • Enlist different formulae to find surface areas and volumes • Apply relevant formulae and compute surface areas and volumes of three dimensional figures 	<p>associated with solid figures</p> <ul style="list-style-type: none"> • Identify various solid figures in the surroundings <p>SKILLS:</p> <ul style="list-style-type: none"> • Analytical thinking • Deductive reasoning • Visual representation • Problem solving <p>APPLICATION:</p> <ul style="list-style-type: none"> • Discussing the formulae to find surface areas and volumes using relevant illustrations • Explaining the application of different formulae in various questions <p>UNDERSTANDING:</p> <ul style="list-style-type: none"> • Classify various solid figures on the basis of their properties • Recognize various formulae to find surface areas and volumes • Solve questions to 	<ul style="list-style-type: none"> • Spatial 	<p>terminology associated with three dimensional figures</p> <ul style="list-style-type: none"> • Identify different formulae to compute surface areas and volumes of solid figures
--	---	---	--	---	--

			understand the application of different formulae		
JANUARY No of Days:18	<p>CIRCLES:</p> <ul style="list-style-type: none"> • Basic terms and definitions • Theorems based on circles • Application of theorems in figure based questions 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Identify different parts of a circle • State and prove various theorems based on circles • Apply different theorems to solve figure based questions 	<p>KNOWLEDGE:</p> <ul style="list-style-type: none"> • Define basic terms associated with a circle • List various theorems based on circles <p>SKILLS:</p> <ul style="list-style-type: none"> • Analytical thinking • Deductive reasoning • Visual representation • Problem solving <p>APPLICATION:</p> <ul style="list-style-type: none"> • Illustrating various theorems using relevant examples • Investigating the theorem to solve figure based questions <p>UNDERSTANDING:</p> <ul style="list-style-type: none"> • Locate different parts of a circle • Discuss various theorems along with relevant illustrations • Solve figure based 	<ul style="list-style-type: none"> • Logical-mathematical • Intrapersonal • Spatial 	<p>Students will be able to:</p> <ul style="list-style-type: none"> • Revise the basic terminology associated with circles • Identify the theorems to solve figure based questions

			questions		
FEBRUARY No of Days:23	REVISION: FINAL TERM ASSESSMENT				
MARCH	CONDUCTION OF FINAL TERM ASSESSMENT
